presentation

Suhas

July 13, 2014

- LaTeX styles for presentations
- Exports to PowerPoint-style presentation format

- Emacs major-mode for organized thought
- Spiritual successor to `outline-mode`
- Supports wide variety of markup
  - *italic*, **bold**, code, verbatim, etc.
  - Inline LaTeX (including math!)
- Can export to LaTeX, HTML, and other formats

- Edit text
- Export to PDF
  - Intermediate LaTeX file is created and saved
  - This allows all the fine-grained tweaking of LaTeX – optionally
- Unfortunately, the difficult bit remains: giving the presentation
