I, Kelly Dean, American citizen and resident, hereby disclaim all patent, copyright, and all other forms of intellectual property ownership of and interest in all of my patches, software manuals, software programs, source code, documentation, revisions thereof, and all other works, past, present, and future, that I sent or will send to the emacs-devel@gnu.org or bug-gnu-emacs@gnu.org mailing lists, to 19479@debbugs.gnu.org, to any other mailing list or email address at gnu.org or any subdomain thereof, or to any developer or maintainer of GNU Emacs or any other GNU software, from my previous (no longer active) email address of kellydeanch@yahoo.com, my current email address of kelly@prtime.org, or any other email address.

I affirm that I have no other proprietary interest that would undermine this release, and will do nothing to undermine it in the future. I represent that all of the aforementioned works are my own and not a copy of someone else's work, except where sources are cited. Patches include citations and partial copies of the works to which the patches apply.

I created all of the works exclusively on my own time. They are not works made for hire, and there's no educational institution, employer, or any other organization or person who owns them. I do not have any agreement with any person or organization saying he or it owns programs I write, and I did not have any such agreement when I created any of the aforementioned works.

All of the works are permanently and irrevocably in the public domain.

Kelly Dean
