

# Converter Setup

- Install BasicODConverter-0.8.0.oxt
  - See contrib/odt/BasicODConverter/
- Customize org-lparse-convert-process
- Choose BasicODConverter from the menu

# Converter Configuration

- Direct export to doc or pdf
  - Customize org-export-odt-preferred-output-format
    - Choose doc or pdf
- Direct export to odp or ppt
  - Customize org-lparse-convert-capabilities
    - Add ppt and odp as output file formats under "Text" document class

# Exporting Org files

- Exporting Org->Doc or Pdf
  - Use C-c C-e O or C-c C-e o
- Exporting Org->Odt/Ppt
  - Visit your .org file
  - M-x org-lparse-and-open
    - Export To: => choose odp or ppt
    - Native Backend: => choose odt
    - Have you read the note of CAUTION?
    - Further Adjustments may be needed

# Converting Non-Org files

- Visit your odt file
- Use C-u M-x org-lparse-convert RET
  - Fill "File to be Converted"
  - Output Format: => choose odp
  - Wait for 10-15s and be patient until the file is produced

# Power Tips

- Use TAB for completing available formats
  - Use of ido mode is highly recommended
- Use org-lparse-convert as Uber-conversion command
  - csv->xls
  - odt->latex
  - odp->html
  - svg->svm
- Create an org-export-as-odp-and-open custom command

# Thanks

- This presentation itself if created using org-odt
- Native org->odp exporter, if there is popular demand
