

Outline

Slide A

I use

```
:PROPERTIES:  
:BEAMER_act: <beamer>  
:END:
```

For slides I only want in the presentation and

Slide B

I don't know how often the `orgframe` is needed (I haven't needed it in the last years of making my presentations with `org-mode`), but wouldn't it be more sensible to write

```
:PROPERTIES:  
:BEAMER_env: orgframe  
:END:
```

When you really do need it?

Slide C

This slide is included, too.
